

April/May Oral Presentation

Due Friday, May 12th

During the month, we will focus on the pond habitat and its various animal inhabitants. Please help your child pick a favorite pond animal to learn about/research at home and prepare to share what she/he has learned about it. Following are some questions for your child to think about but please have your child feel free to share what most interests her/him about the animal of her/his choice.

- What does it look like? (interesting features)
- What is its life cycle?
- What does it eat?
- What animal group does it belong to?
- How does it protect itself from predators?
- Why did you choose this animal?

Your child may write down the information learned, draw a picture, or share her/his learning in another creative way - perhaps make a puppet, make a diorama, make a poster labeling parts of the animal, make a 3-D model, BE CREATIVE and most of all HAVE FUN!

We will display all projects during OPEN HOUSE on
Thursday, May 18th.
